**ISU World Figure Skating Championships 2028
Sustainability**

City	Country	Sustainability plan
Vienna	AUT	<ul style="list-style-type: none"> - Austria has perfect drinking water quality - even in the capital, so we will reduce the use of plastic waterbottles to an absolute minimum. - Transport: Vienna is not a big city, so most distances are quite short. Transport for the spectators will be arranged together with the public transport company, so spectators will be able to go with public transportation for free from the main station to the rink. Also for accredited persons cars and busses should be electric or hybrid. - all partners of the OC are working with regional products and are awarded with different european and austrian seals of approval for bio diversity and sustainability - with the help of the ISU Events App and sportity App for volunteers and spectators, print outs will be reduced to a minimum. - no new facilities have to be built for the Championships
Malmö	SWE	<p>Examples of specific initiatives:</p> <ul style="list-style-type: none"> - Selection of hotels that have an active sustainability effort - Conscious choices of eco-friendly materials for event dressing, signage, etc - Reduce use of bottled water and instead provide excellent water on tap - Reduce waste by using less disposable/single-use materials - Prefer use of digital information and marketing - Sorting/recycling of waste - Social project with focus on integration in society
